

Listing of the Claims:

The following is a complete listing of all the claims in the application, with an indication of the status of each:

1 (Canceled).

1 2 (Currently Amended). The portal site data providing device of claim ~~1~~ 23,
2 ~~further comprising: wherein the~~ a display device ~~for displaying displays~~
3 portal contents information showing the contents of various portal sites, the
4 display device being arranged to read the portal contents information from a
5 portal contents information storage apparatus in which the portal contents
6 information is stored in advance.

1 3 (Currently Amended). The portal site data providing device of claim ~~1~~ 23,
2 wherein the portable terminal is a GSM-type portable telephone, and the
3 memory ~~medium~~ card of the portable terminal is a SIM card.

1 4 (Previously Presented). The portal site data providing device of claim 2,
2 wherein the portal contents information stored in the portal contents
3 information storage apparatus is information regarding various websites which
4 can be accessed in advance through the portal site.

5 (Canceled).

1 6 (Currently Amended). The portal site data providing ~~device~~ system of claim
2 ~~-5~~ 24, ~~further comprising: wherein a the~~ display device ~~for displaying~~
3 displays portal contents information showing the contents of various portal
4 sites, the display device being arranged to read the portal contents information
5 from a portal contents information storage apparatus in which the portal

6 contents information is stored in advance

1 7 (Currently Amended). The portal site data providing device system of claim
2 6, wherein the portal contents information stored in the portal contents
3 information storage apparatus is information regarding various websites which
4 can be accessed in advance through the portal site.

1 8 (Currently Amended). The portal site data providing device system of claim
2 7, wherein:

3 the portal specifying information receiving device is arranged to
4 receive website specifying information for selecting and specifying a website
5 displayed on the display device; and

6 the portal site data providing device comprises:

7 a portal screen data building device arranged for building a portal
8 screen data which shows display data related to an address data accessible to
9 the website selected and specified according to the website specifying
10 information received from the portal managing server, and

11 wherein the address data storage device comprises a portal screen data
12 storage device for storing the portal screen data built by the portal screen data
13 building device in the memory medium card of the portable terminal through
14 the data reading/writing device.

1 9 (Currently Amended). The portal site data providing device system of claim
2 7, wherein:

3 the portal specifying information receiving device is arranged to
4 receive website specifying information for selecting and specifying a website
5 displayed on the display device;

6 the portal site data providing device comprises a portal information
7 transmitting device for transmitting the website specifying information as the

8 portal information to ~~a~~ the portal managing server which manages portal
9 information of the user present on a network; and
10 the address data stored in the memory ~~medium~~ card of the portable
11 terminal by the address data storage device is an address data accessible to a
12 portal site built by the portal managing server according to the portal
13 information transmitted to the portal managing server.

1 10 (Currently Amended). The portal site data providing ~~device~~ system of
2 claim 9, wherein the portal information transmitting device is arranged to
3 transmit an identification data specific to a user, which is inputted through the
4 portal specifying information receiving device, to the portal managing server
5 by including it in the website specifying information.

1 11 (Currently Amended) The portal site data providing ~~device~~ system of claim
2 9, further comprising an identification data reading-out device for reading out
3 identification data specific to a user being stored in advance in ~~a memory~~
4 ~~medium from~~ the memory ~~medium~~ card of the portable terminal through the
5 data reading/writing device, wherein
6 the portal information transmitting device is arranged to transmit the
7 identification data read out by the identification data reading-out device to the
8 portal managing server by including it to the website specifying information.

1 12 (Currently Amended). The portal site data providing ~~device~~ system of
2 claim ~~-5~~ 24, wherein the portable terminal is a GSM-type portable telephone,
3 and the memory ~~medium~~ card of the portable terminal is a removable SIM
4 card, and wherein the portal site data providing device includes a card
5 reader/writer for receiving the removable SIM card and reading data from and
6 writing data to the removable SIM card.

13 to 22 (Canceled).

1 24 (New). A portal site data providing system for reading an ID from a
2 memory card of a portable terminal, receiving a user-input portal specifying
3 information and storing in the memory card of the portable terminal a portal
4 site address for the portable terminal to subsequently access a portal site built
5 according to the user-input portal specifying information, comprising:
6 a portal site data providing device having a display functioning as a
7 user input and a card reader/writer for reading/writing data from/to the
8 memory card when the memory card is inserted in the card reader/writer; and
9 a portal managing server connected to the portal site data providing
10 device via a network, the portal site data providing device reading the ID from
11 a memory card inserted in the card reader/writer and transmitting the ID to the
12 portal managing server for authentication by the portal managing server;
13 the portal site data providing device further including:
14 a data reading/writing processing unit for reading/writing data from/to
15 the memory card of the portable terminal inserted in the card
16 reader/writer, the data reading/writing processing unit arranged
17 to read the ID from the memory card;
18 a communication processing unit for transmitting the ID read from the
19 memory card to the portal managing server;
20 a portal specifying information receiving device for receiving a
21 user-input portal specifying information specifying user
22 selection from among a plurality of portal site content options
23 generated by the portal managing server; and
24 a portal site data providing device for transmitting the user-input portal
25 specifying information to the portal managing server and for receiving, from
26 the portal managing server, a corresponding user-specific portal site address

27 data indicating an address for the portable terminal to subsequently access the
28 portal site specified by the user-input portal specifying information,
29 wherein the data reading/writing processing unit is arranged to store
30 the corresponding user-specific portal site address data appended to the ID
31 read from the memory card in the memory card of the portable terminal; and
32 the portal managing server further including:
33 a transmitting/receiving unit for performing transmission/reception of
34 the data between portal managing server and the portal site data
35 providing device;
36 a user authentication unit for authenticating the ID read out from the
37 memory card as identification data peculiar to the user;
38 a portal site building unit for building a portal site based on portal
39 information supplied by the user;
40 a contents managing unit for managing website contents which can be
41 contained in the portal site for the user; and
42 a respective user portal information storage unit showing
43 configurations of portal sites for each user of the system.

1 25 (New). A method for supplying portal site data to a portable terminal, the
2 method comprising the steps of:
3 providing a user with a portable terminal having a removable memory
4 card having a pre-stored unique ID;
5 providing a portal site managing system including a portal site data
6 providing device connected to a portal managing server via a network, said
7 portal site data providing device storing, in the memory card of the portable
8 terminal, data which enables making an access to a portal site desired by the
9 user or a portal site having a link to a desired website provided in advance by
10 receiving it from another device without operating the portable terminal, said
11 portal site data providing device having a data reading/writing device for

12 reading from and writing to the removable memory card and a display
13 functioning as a user input;
14 in response to a user input, prompting the user at the portal site data
15 providing device to insert the removable memory card from the portable
16 terminal in the data reading/writing device;
17 reading the ID from the removable memory card and transmitting the
18 read ID to the portal managing server;
19 verifying the ID of the user by the portal managing server;
20 transmitting by the portal managing server to the portal site data
21 providing device portal site content specifying information for display;
22 prompting the user to select content specifying information displayed;
23 transmitting by the portal site data providing device to the portal
24 managing server user-input portal site content specifying information
25 indicating a user selection from among a plurality of portal site content
26 options;
27 generating, in the portal managing server, a user-specified portal site
28 building information based, in part, on the user-input portal site content
29 specifying information;
30 storing in the portal managing server the user-specified portal site
31 building information, the user-specified portal site building information being
32 retrievable based on a portal site address data having the received ID;
33 transmitting by the portal managing server to the portal site providing
34 device the user-specified portal site building information;
35 storing by the portal site providing device, in the memory card of the
36 portable terminal, the portal site address data having the received ID; and
37 prompting the user to remove the memory card from the data
38 reading/writing device and insert the memory card containing the portal site
39 address data in the portable terminal.

1 26 (New). A computer program product comprising computer executable
2 instructions stored on a computer-readable storage medium which, when
3 executed by a computer, implements a method for supplying portal site data to
4 a portable terminal having a removable memory card having a pre-stored
5 unique ID, the method comprising the steps of:
6 in response to a user input at a portal site data providing device
7 connected to a portal managing server via a network, prompting the user at the
8 portal site data providing device to insert the removable memory card from the
9 portable terminal in a data reading/writing device of the portal site data
10 providing device;
11 reading the ID from the removable memory card and transmitting the
12 read ID to the portal managing server for verification;
13 receiving portal site content specifying information for display to the
14 user;
15 prompting the user to select content specifying information displayed;
16 transmitting to the portal managing server user-input portal site content
17 specifying information indicating a user selection from among a plurality of
18 portal site content options;
19 receiving a user-specified portal site building information based, in
20 part, on the user-input portal site content specifying information;
21 storing by the portal site providing device, in the memory card of the
22 portable terminal, the portal site address data having the received ID; and
23 prompting the user to remove the memory card from the data
24 reading/writing device and insert the memory card containing the portal site
25 address data in the portable terminal.
